

The two organisations - the Hungarian Crime Stop Foundation and the Turkish Bozyazi Kultur Sanat Ve Muzik Dernegi - have established a joint strategic partnership to support disadvantaged target groups (now: people facing barriers or with fewer opportunities), to work together and to develop and improve their cooperation during the project period and beyond. Our aim is to increase the learning capacity of the final beneficiary group, i.e. people with any kind of barrier, to identify opportunities, to learn and share experiences together, to learn about and apply systems, methods and potentials not used by organisations so far, with a particular focus on the following target groups:

- social barriers
- economic barriers
- barriers related to discrimination, in general, other barriers are also targeted.

1.

It was also our goal to increase organisational capacity and organisational development - both organisations are relatively small but they are constantly working. This is because when organisations grow and develop, it necessarily has a positive impact on the life chances of their target group. The topic was developed by highlighting and linking the areas of arts and digital competence development.

#### **Project activities:**

- project management: operational and professional coordination of the partnership and the project's professional work, documentation, dissemination;
- Transnational Meetings 1-3 (2 in person, 1 online - modified from the original idea – TM 1 in Hungary (24-25 March 2022, TM 2 in Turkey: 19-20 May 2022, TM 3 online: 28 December 2022) - gathering experience in an international arena, in a given country, meeting and communicating with professionals with a thematic focus; supported by supporting documents;
- 1 Bilateral meeting (14-15 September 2022, Hungary)
- International Training (within the partnership) (2 face-to-face sessions, online sessions were also implemented: 1 in Hungary, 2 in Turkey) - 1. 30.06.2022 - 01.07.2022 (02.07.2022) in Hungary, 2. 11-12.08.2022 in Turkey: main objective is a first-hand experience through training in a practice-oriented way, combined with professional visits;
- Multiplier Event (2 times, 1st time in Hungary, 2nd time in Turkey) - main goal and task: presentation of the project tasks and results;
- Creating concrete results (Good practices, methods in learning projects for people with barriers, Methodological Guide).

#### **Results:**

- Good practices, methods in learning projects for people with barriers (presenting good practices that can be used and applied in the everyday practical work of other similar and/or relevant organisations);
- Methodological Guide (the methodological guide aims to show how and in what ways the partnership thinks about the

2.

possibilities of combining arts and digital competence; those that can in some way empower, develop, help target groups with any kind of barriers (social, health, etc.); and to give other relevant organisations ideas and opportunities to plan similar projects);

- the possibility for small-scale NGOs to have a presence on the international stage, as the call for proposals suggests;
- to increase project management experience and capacity;
- long-term international partnership, development and submission of new projects;

- developing the skills of professionals and organisations;
- increasing resilience at organisational level;
- increasing the opportunities for direct target group members.
